

Secure Metadata Management Platform

RECLAIMING DIGITAL PRIVACY IN A HYPER-CONNECTED WORLD

CORE PILLAR

Privacy-First Architecture

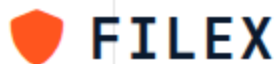

FileX operates entirely client-side — your files never leave your browser. No servers, no uploads, no compromises. Metadata extraction, sanitization, and risk assessment happen locally on your device.

MISSION

Built for Trust

Open-source transparency meets enterprise-grade security. Every line of code is auditable. Every metadata field is controllable. Users own their data — from upload to export to permanent deletion.

Secure Metadata Management Platform

YOUR FILES ARE LEAKING MORE THAN YOU THINK

⚠ THE HIDDEN PROBLEM

Every photo, document, and spreadsheet carries hidden metadata — GPS coordinates, device identifiers, author names, and creation timestamps — that expose sensitive personal and professional information.

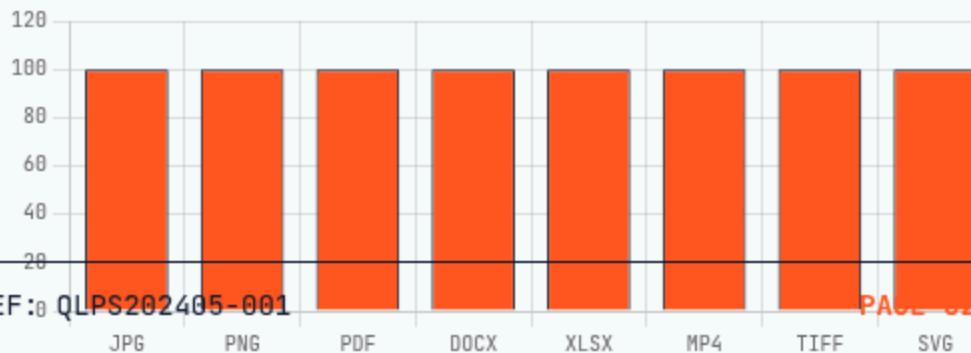

- ✗ 97% of photos contain GPS metadata by default
- ✗ Corporate documents leak author & org info
- ✗ Medical records expose patient identifiers
- ✗ No easy tool for batch metadata sanitization

🚀 THE FILEX SOLUTION

FileX provides a unified, browser-based platform for identifying, extracting, and removing sensitive metadata from any file — with AI-powered risk assessment and privacy templates.

- ✓ Universal file support (images, PDFs, docs)
- ✓ Client-side processing — zero server exposure
- ✓ AI risk scoring with actionable suggestions
- ✓ Privacy templates for common scenarios

UNIVERSAL FILE FORMAT SUPPORT

AI-POWERED PROTECTION AND A PROFESSIONAL TECH STACK

IBM WATSON POWERED

Intelligent Risk Assessment Module

During development, IBM Watson's AI toolkit was used for prototyping the AI-powered risk assessment module. This integration helped refine the logic for identifying and categorizing sensitive information within file metadata, contributing to the robust privacy protection mechanisms now embedded in FileX.

PRODUCT ROADMAP

Enterprise API Integration

RESTful and GraphQL APIs for seamless integration into enterprise workflows, DMS platforms, and compliance pipelines.

Q2 2025

Expanded IBM Watson AI Capabilities

Deeper NLP analysis, predictive risk scoring, automated policy enforcement, and multi-language support powered by IBM Watson.

Q3 2025

Mobile Excellence

Native iOS and Android applications with on-device processing, camera integration for instant metadata stripping, and offline support.

Q4 2025
